RETURN TO CIA

1. On the Dolni Dvoriste (049/Q92)-Kaplice (049/Q93) highway between the villages Nazidla (049/Q93) and Suchdol (049/Q93) two sets of wooden barriers have been built. The barriers are about 300 m. apart and are set up so that there is a narrow passage 3.5 m. wide in the middle of the highway.
2. Near the Horni Dvoriste-Kaplice railroad about one kilometer west-northwest of the village of Trojany (049/Q92) there is an observation tower which has been guarded by PS members. The guard consists of two men and a dog. One of the men watches from the top of the tower, while the other remains on the ground with the dog. The guard was observed to be mounted at 2 P.M.
3. About 1.5 km. southwest of Znojmo (049/S06) two lines of trenches have been built facing the Austrian border. The distance between them is about 300 m. The trenches are about 1.5 m. deep and 50 cm. wide. Positions for machine guns have been dug out in the trenches, and in some places the walls are supported by logs. Between the two lines of trenches, trihedron wire obstacles about 120 cm. high have been placed.
